PROFESSIONAL SUMMARY

Frontend-focused Web Developer with 1+ year of hands-on experience building responsive and modern web applications. Skilled in React, JavaScript, Tailwind CSS, Vite, and Git/GitHub. Experienced in developing real-world projects and deploying applications with Vercel. Currently expanding into TypeScript, Next.js, Node.js, and full-stack development.

EDUCATION

Web Development

Self-Directed Learning

Practical training in frontend development, React, modern CSS, responsive design, Git/GitHub, and deployment.

Current Development Focus

Full-Stack Web Development

Expanding skills in TypeScript, Next.js, Node.js, backend development, and databases.

PROJECT EXPERIENCE

Independent Web Developer

Project-Based Work

- Developed responsive web applications using React and modern frontend technologies
- Translated project requirements into structured and reusable interfaces
- Built reusable components with organized project architecture
- Managed source code with Git and GitHub
- Deployed and maintained applications using Vercel
- Applied responsive design and modern UI development practices

ADDITIONAL INFORMATION

- Strong interest in modern frontend and full-stack web development
- continuously developing skills through practical, project-based learning
- Interested in building scalable applications and real-world software projects

PROJECTS

Khazane – Personal Finance PWA

React • Vite • Tailwind CSS • Dexie • PWA

Offline-first personal finance PWA with Persian RTL support, biometric authentication, local data storage, interactive charts, and PDF export. Designed for responsive mobile and desktop use and deployed on Vercel.

Abdullah Foundation – Client Website

React • Vite • Tailwind CSS • Vercel

Responsive website developed for Abdullah Foundation with structured content sections, responsive layouts, imagery, contact and donation flows, and production deployment.

My Portfolio – Personal Portfolio

React • TypeScript • Vite • Tailwind CSS • GSAP

Modern responsive portfolio website designed to showcase web-development skills, projects, experience, and contact information with interactive animations.

Image Asset Toolkit

Python • Pillow • CLI

Practical image-processing toolkit for renaming, resizing, format conversion, image inspection, and efficient WebP optimization for web assets.
